Some Testimonials for your use, others on request. Thank you John S.A.

idp Global – Commercial Generator. Single Phase 208/120v. – 225amp Main.

From: Tatiana Jimenez <----->
To: Eagle Electric Admin. <eagleadmin@sbcglobal.net>

Hi Michelle,

Thank you very much for getting back so promptly and for the 5% discount on the full amount of the installation. I will submit both invoices (\$---- for the battery) and \$---- for the installation and as I mentioned, the checks will be mailed tomorrow with the understanding all is working appropriately after today's test. Additionally, I was wondering if John had gotten a chance to see the e-mail where we inquire about the service agreements?

On a side note, I'd like to thank you for the professionalism and care your workers have had with our facility and the work they have been doing. I am positively impressed and see that as a reflection of your company and leadership.

Many thanks,

Tatiana

L&R Construction – Commercial Electrical.
3Phase 277/480v – 208/120v with Transformers.

L&R Construction, Inc., would like to thank John Antonio and the entire Eagle Electric team for assisting us in completing our second construction project for Five Guys Burgers and Fries in September of 2011, on time and as always under budget.

Eagle Electric does not know the meaning of the word NO or any other negative term in the English language. John is an unbelievable estimator, a strong leader, and a wonderful family man. I have had the pleasure of knowing John for a couple of years and even though we have been through some difficult situations, John knows how to handle just about anything and does it with professionalism, class and respect for others. Eagle Electric is completely reliable, they are always on time, and their workmanship is second to none.

Cheers John! To you and your electrical team.
Larry Cimmarusti
Project Manager
L&R Construction Inc.

Dear Sir or Madam:

I would like to take this time to recognize the fine work that we here at Grifols Biologicals have received from Eagle Electric. They make a great effort to do a truly professional job that always exceeds our expectations. They are very knowledgeable in the electrical field and always do a safe job following the National Electrical Code, State, and City codes. There is never a problem getting the jobs inspected. Also, they are very fair in there pricing, and can usually out bid the competition. They are friendly, and I would recommend them for any job, small or large.

Sincerely,

Jeff Groman

RE: Eagle Electric

To Whom It May Concern:

It is my pleasure to offer this letter of recommendation for Eagle Electric. I met John and his staff in January of this year when we initiated the construction of 32,000 square feet of medical office space in Beverly Hills. The build-out focused primarily on two floors of a three story office building, but the scope of work for the Electricians stretched from the first floor of the parking garage to the roof. Electrical work included but was not limited to the installation of temporary work lighting, cable trays and telco/data conduits, UPS equipment, two new server rooms, an x-ray facility, new 3-phase panels, transformers, new main switch gear, lighting control timers, a new emergency panel, exit and emergency lighting, not to mention all of the conduits, wiring, lighting, switches, outlets, etc. associated with this much clinical space. Eagle Electric's work was always professional, timely and neat. On occasion, the actual field conditions for this job did not align with the plan documents. With John's help and creative solutions, none of these discrepancies ever resulted in a work delay or down time. All inspections were passed without incident. Eagle Electric's professional approach and attention to detail afforded me level of confidence to which I am not accustomed for a project of this size. I am happy to recommend Eagle Electric and look forward to working with them in the future.

Best regards,

Mark Kruse
Director of Facilities and Purchasing

Custom Home – Residential Electrical. Single Phase 208/120v. 200amp

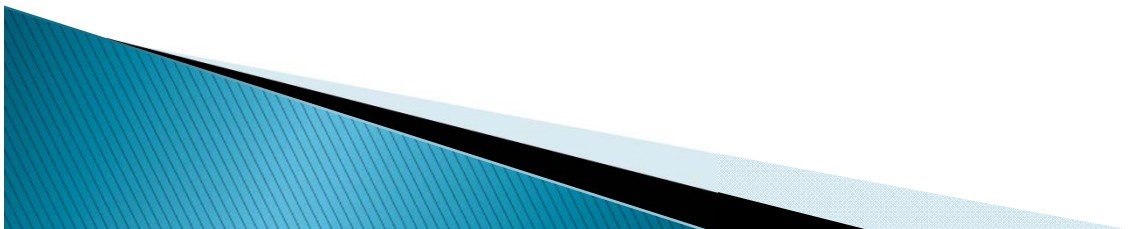

Dear John:

The following can be used on your website:

Eagle Electric has worked on a number of my projects including a custom 5,600 square foot house. I have been and am extremely happy with the services and diligence in performing these various services for me. I would recommend their services without hesitation.

To Whom It May Concern:

Eagle Electric has completed several high and low voltage electrical projects at our pharmaceutical facility on Valley Blvd and at our corporate office complex on adjacent Lillyvale Ave. We are very pleased with Eagle's performance and with the quality of work. Overall the projects have been very successful from a schedule, budgetary and inspection viewpoints. We will continue to contract with Eagle as projects occur.

Sincerely,

Timothy Quille
Engineering Manager

Feb 3, 2012

Dear John, Michelle and Eagle Electric Construction Team:

It is with great pleasure I write this recommendation about the exceptional experience of working with your company. IDP hired Eagle to install an electric generator. We are absolutely delighted with the work and the people from your company. Based on your excellent results, we requested further services from Eagle. These were promptly scheduled and completed in a timely manner and with the same level of excellence.

The customer service was simply the best I have seen in a long time. Everyone was such a pleasure to work with. I was pleasantly surprised to see a crew of workers be so careful in how they left our space after each work session. They were punctual and very mindful of our business needs while doing their work.

John and Michelle were superb all along the way: thorough, efficient, clear, very friendly, honest and courteous. The pricing is comparable while the experience was exceptional.

I thoroughly enjoyed doing business with you, which in my experience, was due to the excellence, honesty and integrity in which you lead your company.

It has been a true honor getting to know you and we look forward to our continued work together.

With gratitude and appreciation,
